

The Creston Work Experience program provided myself with valuable hands on experience that I was unable to get anywhere else. It's great to see and do the daily routines of full time firefighters not to mention the amount of experience gained attending calls. The staff and accommodations were great, and I am proud to say that I worked apart of such an organization. I can honestly say that the program gave myself a one up on other candidates applying for full time career jobs. If you're serious about becoming a Full Time Firefighter fast, then I would recommend this program to you.
